The Conservation Pledge

I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.

Jackson County, Oregon Gets Sued

On May 20, 2014 *Jackson County* voters went to the polls as citizens of the *United States of America* (USA) and overwhelmingly passed a landslide ban against the GMO soil invasion of their county. In November 2014, two GMO alfalfa growers, the *Schulz Family Farm LLC* and *James and Marilyn Frink*, filed a lawsuit against *Jackson County, OREGON*. Their suing the county is an effort to prevent the new ordinance from going into effect June 6, 2015.

Voters might notice how good you feel when you empower your local activists to defend the ban. How would it feel if you sent a letter to your legislators requesting a meeting with them in their district offices. What if you held your elected officials accountable to uphold the vote.

Dr. Ray Seidler, former *Environmental Protection Agency* (EPA) scientist in charge of biosafety research agrees with *Our Family Farms Coalition* that the *County Commissioners* should strongly oppose the lawsuit with topnotch legal defense!

Dr. Seidler informs that, according to the *United States Department of Agriculture* (USDA), recent USA alfalfa exports to CHINA are in quarantine due to detection of GMO traits.

The backdrop is that the GMO alfalfa only recently existed. There was no such thing in existence previously.

GMO Alfalfa is such a new kid on the block that the first conventional farmer who discovered his field was contaminated with GMO alfalfa traits was in WASHINGTON in August 2012.

It's barely been grown anywhere, but already GMO alfalfa from IDAHO has contaminated conventional alfalfa seed crops as far away as MONTANA and WYOMING.

.....

January 20, 2015

Page 2

That just goes to show how very invasive, pervasive, and noxious GMO crops are to conventional and organic growers who were farming first and need safeguarding. Prevention is always the best cure to what ails.

That's why in March, 2013, conventional alfalfa growers in *Imperial County*, CALIFORNIA, successfully pressured *Monsanto* to keep their GMO alfalfa out of their county!

Jackson County, OREGON voters stood tall with local farmers, and the ban against GMO crops passed with flying colors in May 2014.

On November 4, 2014 voters in *Kauai* and *Maui*, HAWAII passed similar restrictions last month at the polls.

What happens when voters ask the *County Commissioners* to watch the documentary films highlighting that GMO crops are a safety issue of global prime concern. It's time to get the facts of the matter into the hands of your local politicians. What are you waiting for?

(Sources: November 19, 2014, DAILY TIDINGS, "*Suit Seeks to overturn GMO ban*" by Greg Stiles; December 12, 2014, MAIL TRIBUNE, "*Suit threatens farms, democratic vote*" by Elise Higley and Ray Seidler ; www.ourfamilyfarmscoalition.org)

Be Your Own Santa Claus

If I could make a suggestion, I'd like to make a suggestion or two. May I suggest the link to see the new **ORIGINS** movie in full, for a limited time at <http://www.origins.well.org/movie>.

If I may, I'd also like to suggest seeing two more new documentary movies, **COWSPIRACY**, and the other new documentary is **FED UP**. In this day and age of documentaries, ignorance is no excuse.

Another eye-opener is the documentary film, called **BOUGHT**.

You might even notice **THE CORPORATION**, a film by *Mark Achbar*, *Jennifer Abbott*, and *Joel Bakan* came out last decade. The documentary's companion book was a bestseller.

And of course there are the old standbys: *Genetic Roulette*, *GMO: OMG*, *Seeds of Death*, and many more, already mentioned in previous issues of these *Eco-Community Dialogues* newsletters and on *YOU Tube*.

Take Up Your Pen

“Private capitalists inevitably control the main sources of information making it extremely difficult for individual citizens to come to objective conclusions and make intelligent use of their political right”.

--Albert Einstein, 1948

The pen is mightier than the *Private Capitalists'* swords. Voters must work smarter, not harder. Take up your pen and write letters to the newspapers.

Vote With Your Dollars

Doesn't the *Bio-Medical* Industry want doctors and nurses to be able to track allergic reactions and food illnesses to *Food Produced by Genetic Engineering*.

If you have a Smart Phone, download BUYCOTT, a *free* five-star App that scans items in the grocery store. Just point your Iphone at a bar code and BUYCOTT will let you know whether the parent corporation fought against traceability.

Climate Eugenics

It's Winter and you feel like hibernating. But be not Teddy Bears. There's no rest for the weary. When the going gets tough, the tough get going. Put up your Dukes, because I'm going to sell you something. I'm going to sell you on an idea. The idea is *Freedom*. Freedom is actually free but you have to seize the Day. This is the dawning of a New Day. Don't let it slip through your fingers like sand. *Get a grip*.

You probably already know about the melting of the *Arctic Ice Caps* and radical *Methane Escalation*. We used to have natural *Ozone Protection* before the sky was used as a physics lab, didn't we. Now the *Ozone Layer* has bigger holes. Worse *Ozone Holes* mean a *Solar Flare* could get through and knock out the *Electric Grid*.

Now you get the Big Picture. It's *Climate Hell* if the electric grid is interrupted, because hundreds of *Nuclear Plants* would have nuclear energy MELTDOWNS simultaneously.

Global Geoengineering Governance means everything on EARTH has been risked. It's time to speak out about the *Genocidal Behavior* of trying to control the Sun. Abusing the atmosphere has threatened all life processes on EARTH. Science and Technology absolutely must step aside now to give Nature the chance to heal her *Ozone Layer*.

MONSANTO bought the *Climate Corporation* and is developing aluminum resistant crops. *Does that tell you something*.

A person might wonder who the other *Insiders* are. Their present course is quickly heading toward the systemic collapse of *all* things.

Look Up! When you see atmospheric spraying turn into milky white haze that becomes man-made clouds, take pictures! Get the *Skyder Alert App* to send your pictures to show lawmakers where *Global Geoengineering Governance* is occurring overhead. See <http://www.skyderalert.com>. *But hurry! Lung cancer is no joke.*

Existence Hangs in the Balance

Who is in charge of your minds! Take back your objective conclusions. Take responsibility for where you *are*. Bless the Waters. Save the *Heirloom seeds*. Let the desserts bloom with sweet-scented *Roses* and other *Edible Flowers* and *Medicinal Herbs*. Revive the food wastelands with organic compost. Bring back the rich, fertile soil of our Forefathers. Take back *Home Gardening*, people! Take up your garden hand trowels and plant a backyard Victory Garden.

Brother and Sister Man must learn *Star Wars* no more. Let go of *Nuclear Arsenals* on EARTH and in SPACE. Turn the hearts of the children to Peace instead of *Virtual War* games. *Decree peace over Military-Industrial prosperity!*

Nothing is stopping the Grassroots movements except limiting beliefs. Take back your civic rights. Emphasis now has to be placed on the Highest Value! Chunk all the way up to EXISTANCE itself! That's what is really at stake. Man's *Prideful Science* and Technology is leading an *Arrogant Trend* that is heading toward a *Fall*. Do you really think other planets or other realms want Man to enter their sacred space when we have not yet learned to love our own. *Get real.*

If you are reading this then you are a strong survivor of the most *Materially Degenerate Age* that has ever been coddled. You are the *Man*, the *Woman*, or the *Child* who is intelligent and smart enough to make a difference. The *Culture of Death* is headed toward Climate Eugenics. Only you and others who are ushering in a *Counter-Culture of Life* can make change occur. The change that is needed is the *Restitution* of pure air, pure water, and pure food.

Seize the moment. Choose Life. This is the moment of empowerment. Decide to simplify your lifestyle. Teach the *Conservation Pledge*. Brother and Sister Man are *One Family*. *Be the Light.*

You can help bring about the first *Worldwide Jubilee Year* because the world needs to be set free from the grip of *Biotechnology* and *Global Geoengineering Management*. Stick to the trunk of the tree. Bring back the bees and pollinators. Build back rich topsoil. Plant Heirloom seeds. Learn organic gardening practices. Plant a backyard Victory Garden. Live simply so that others can simply live. Future generations want to exist. Stop, look, and listen to the *Higher Intelligence* inherent in *Nature's Commons* that kept Man alive all these millennia.

January 20, 2015

Page 5

It takes a grain of humility for *Science and Technology* to bow a little to Mother EARTH's *Great Spirit*. But only the women can save us now. One can bend the ear toward the EARTH Elders, the *13 Indigenous Grandmothers*. They may have some pearls of *Great Price*.

The Moon, this Solar System, and other Galaxies should be off-limits because there's a lot of love that needs to be learned right here. This is our Home, not *Mars*. You can't run away from finding the solution to Nuclear Waste, so stop doing it. *Duh*.

Bloom where planted does *not* mean algae blooms in the Ocean. This generation needs to clean up its pollution of the lakes, rivers, and Seas. It's immature to want to *Escape*. Nobody wants to be *Left Behind*. Those who seek to save only their own lives shall lose them according to a principle of karma.

The Natural World

Herbalism has been with humanity since Life began. There are some lessons that only the *Chlorophyll Kingdom* of the wood element can teach. There is a symbiotic relationship between *Flora* and the *Faerie Insect World*. But did you know that *Spiders* are *Arachnids*. That's right, *Arachnids* dine on the *Good Faeries*. They eat them.

Now worries, you are *not* a little bug. Compared to your size, *Arachnids* are itty bitsy and harmless. There are just a couple of wee *Arachnids* to avoid, the *Black Widow* and the *Brown Recluse*.

Black Widows have a reddish hourglass mark, and build spider webs. They are attracted to firewood, lumber, old tires, and outhouses. If you notice a *Black Widow*, kill it, and get rid of its web, because they are prolific. A vacuum cleaner works fine for this housekeeping task.

Brown Recluse spiders are also called the *Fiddleback* or *Violin Spider* because of their violin-shaped mark. They have no webs, because they wander around the house looking for dark attics, boxes, piles of old clothes, firewood, old furniture, and undisturbed storage areas. The best avoidance is to keep things tidy and well-vacuumed.

If you are bitten by either, go to an ER immediately. Again the best cure is prevention. Keeping things clean and functional goes a long way toward making things beautiful and keeps house spiders outdoors where they belong.

(Source: January/February 1999 MOTHERING, "*A Life with Bugs*" by Bryan Reynolds)

Fresh Flowers

The herbal greenery of the world nurtures and rejuvenates the Soul so have yourself a *Merry Little Christmas* and bring the hostess fresh flowers.

(SOURCE: THE SECRET OF LETTING GO, chapter 4, "*Lift Yourself Into a Brand-New World*", by Guy Finley)

Forge On Courageously

Eco-Community Dialogues newsletters are a FREE community service, available by request, at the *A Street Print & Parcel* across from ACE hardware, in Ashland, OREGON. The print shop only charges for paper and ink, or will download the entire PDF file of current and back issues onto people's zip drives to read off their computers and save paper and ink. It's up to you to provide your own zip drive. The entire archive of past issues can be downloaded onto a zip drive if you take yours over to the *Print Shop*. Then you can print it out to read on your own printer.
